

COMPANY HEALTH AND SAFETY POLICY

The key to a safe and healthy workplace starts with a robust policy that not only complies legally, but also describes how the management of a company wishes to conduct its work to ensure that people go home safely at night.

Where an employer has 5 or more employees, they must have a written Health and Safety Policy to enable the successful planning, management, monitoring and control of the Company's undertaking.

Our team of specialist consultants provide specific Health and Safety Policies for companies in England and Wales.
