

## RISK ASSESSMENTS AND METHOD STATEMENTS

Planning and communication are key factors in promoting the good health and well-being of your employees, keeping them free from harm.

Employers have a legal duty to identify and record hazards in the workplace, as well as a proposal to reduce the risks of personal injury to any person affected by the company's undertaking.

### Key Features of our Service

- Providing risk assessments and method statements for clients having inspected the workplace and activity to be performed
- Provision of our online health and safety risk assessment form for self-completion by the client; its contents checked by our specialist advisors prior to work commencing
- Less paperwork, more information by electronic transfer
- BIM compliant information processing

### Key Benefits of our Service

- High risk activities properly inspected and analysed to form a clear safe system of work for your employees
- Self-completion forms for your business checked by our Safety Advisers prior to the works providing:
  - Online capability for completion and publication
  - Immediate acceptance of the risk assessment confirmed at the touch of a submission button
- Low cost outlay for contractors
- Legal compliance with the Management of Health and Safety at Work Regulations 1999
